SECTION 01

Introduction

The business, the goal, and how AI shaped the way we work.

THIRD SPACE

GROUP 1

THIRD SPACE

WHAT THEY DO

Premium health clubs combining fitness, wellness, recovery, and hospitality

Known for exceptional facilities, expert trainers, and luxury member experience

13 clubs · 35,000 members · £100M revenue (2023)

WHAT MAKES THEM DIFFERENT

- "Health clubs, not gyms"
- Focus on holistic wellbeing
- Strong emphasis on community and customer experience

INTRODUCTION

Why We Chose Third Space

Experience-led differentiation in a highly competitive fitness market.

OUR PROJECT GOAL

Use generative AI across every stage: audience research, prompting, drafting and optimisation while keeping creativity, accuracy and ethics firmly human-led.

A content-rich audience

Affluent, engaged members, ideal to create and target for.

A digitally-native membership

Members skew young, urban and online

A premium-growth market

High-value content has real commercial upside.

THIRD SPACE

SECTION 02

Audience Research

Who we're building content for and how data and AI shaped every decision.

MARKET CONTEXT

The Opportunity

11.5M¹

UK gym members in 2024,
+6.1% year-on-year

43%²

of 16–34s plan to raise
gym spend (vs 23% of 35+)

£1.1bn³

UK premium gym segment
fastest-growing tier

2 in 3⁴

fitness-club members are
Gen Z or Millennial

WHAT THE DATA TELLS US

- Younger, wealthier, London-based professionals are driving premium-gym growth.
- A third of exercisers now use AI to build personalised fitness & nutrition plans.
- London has the UK's highest density of premium studios; Third Space's home turf.

TARGET PERSONA

Meet Maya

Maya Chen

Senior Management Consultant

29 · Islington, London · £88k income · Single

“When I train it has to be the best hour of my day, I won't queue for a squat rack.”

SNAPSHOT

Generation	Gen Z / Millennial cusp
Occupation	Senior consultant · 55-hr weeks
Household income	£88,000 (top decile, London)
Lives	8 min from Third Space Islington
Trains	4–5× / week · 6am or post-work
Tech & habits	Apple Watch + Whoop · ClassPass-savvy
Fitness spend	£3000+ / year, rising
Core values	Status · time-efficiency · exclusivity

WHAT DRIVES HER

Motivation & Pain Points

MOTIVATIONS

Maintain fitness & physique

Visible results from consistent, high-quality training.

Exclusive facilities, no compromise

Want elite kit and classes without trade-offs.

Belong to a like-minded community

Train among ambitious, health-focused peers.

Stay ahead of wellness trends

Recovery, Pilates, Hyrox, data-led training.

PAIN POINTS

Time scarcity

Unpredictable work hours wreck fixed routines.

Overcrowded gyms

Queues and waits undermine the premium feel.

Guilt over inconsistency

Busy periods break momentum and motivation.

30% of UK 25–34s say mental health blocks exercise. Community, recovery and a judgement-free premium space are decisive.

FROM NEED TO OFFER

What She Wants → How We Deliver

THEY WANT

**Uncompromising
luxury**

THIRD SPACE DELIVERS

Boutique-hotel changing
rooms, Cowshed amenities,
wet spa & contrast therapy.

THEY WANT

**To train around the
chaos**

THIRD SPACE DELIVERS

Open from 05:30, beside
every major office, before,
between or after work.

THEY WANT

**Premium kit &
guidance**

THIRD SPACE DELIVERS

Eleiko, Technogym &
Woodway; award-winning
personal trainers from
£85/hr.

THEY WANT

**Community & space
to work**

THIRD SPACE DELIVERS

100+ classes a week,
member events, workspace
and concierge service.

Every want above maps to a real Third Space feature, the persona drove what content we created and the proof points we led with.

SECONDARY PERSONAS

Beyond Maya - Who Else Fits

We lead with Maya but build modular content, a few asset swaps re-target Sarah or Daniel, maximising reach without diluting the brand.

Sarah Whitmore

44 · Executive Director · London

Time-poor leader investing in longevity.

WHY THEY FIT

High disposable income; prizes recovery, healthspan, and discretion over aesthetics. Loyal and low-churn.

CONTENT THAT CONVERTS

- Channel — Email & LinkedIn
- Angle — Longevity, recovery, expert-led, quiet luxury
- CTA — "Book a wellness consultation."

Daniel Reyes

35 · Finance / Tech · London

Competitive professional chasing performance.

WHY THEY FIT

Large, high-earning male segment; drawn to strength, HYROX, data and status, high personal-training attach-rate.

CONTENT THAT CONVERTS

- Channel — Instagram & Strava
- Angle — Performance, competition, efficiency, results
- CTA — "Start a trial + PT package."

AI APPLICATION

How AI Shaped The Persona

**PROMPTING**

"Generate 50 synthetic profiles of London professionals aged 24–35 earning £65k+ who value premium fitness. For each: role, weekly training frequency, top 3 motivations, top 3 gym frustrations."

ChatGPT-4o**AI OUTPUT**

Clustered the dataset: dominant themes were time-scarcity (72%), crowding (58%) and a desire for status + community. Drafted a composite persona + positioning statement.

Claude Opus 4.8**HUMAN EDIT**

Fact-checked invented stats against CBRE & PureGym 2025/26; corrected a deflated income figure; rewrote a generic, chirpy tone into Third Space's confident, premium voice.

Team review**POSITIONING STATEMENT** · AI-drafted, human-final

For Londoners who run hard and won't slow down, Third Space makes elite training the easiest part of a brutal week. Premium, private and no compromise.

AI APPLICATION

How AI Shaped Targetting

Shift the persona from her 30s to her 40s and AI re-tunes the entire content.

GEMINI PROMPT

MAYA · 30s

Cinematic 9:16, 8s. A **woman in her late 20s** strides through a London Tube station at dawn, then taps into a premium club. **Fast cuts, high energy**, warm light. Tone: **aspirational, time-savvy**. On-screen text: "**The best hour of your day.**" Music: **upbeat electronic**. CTA: "**Book your tour.**"

GEMINI PROMPT

SARAH · 40s

Cinematic 9:16, 8s. A **woman in her mid-40s** moves calmly from a busy day into a serene recovery suite – sauna, stretch, breathwork. **Slower, elegant pacing**, soft light. Tone: **restorative, longevity-led**. On-screen text: "**Invest in your future self.**" Music: **calm ambient**. CTA: "**Book a wellness consultation.**"

WHAT THE AI CHANGES · 30s → 40s

VISUAL

Energetic → restorative

COPY

Aesthetics & time → longevity

MUSIC

Upbeat → ambient

CTA

Book a tour → wellness consult

SECTION 03

Prompting & Generation

How we prompted, generated and refined every word.

Why Video + Email Campaign?

Short & Long Form Video

- Maya lives on Instagram - 72% of our cluster uses Reels daily
- Video captures Third Space feeling in seconds - the pools, spin studios, recovery room
- 20 second Reel format fits her time-scarce style (scrolling at 6am)
- AI drafts the scene brief and captures, we create the creative vision

Email Campaign

- Email delivers the highest ROI for luxury fitness - 42:1 vs social (DMA 2024)
- Lost member re-engagement → personalised subject lines, single CTA
- Timed: Tue/Thu 7-8am - Maya checks her emails for the day
- AI structures for impactful content, humans refine for Third Space voice

Stage 01: Ideation - Video

PROMPT

"You are a Senior Strategist for Third Space London - a luxury health club whose members are time-scarce professionals aged 25-40. Generate 6 short term video concepts for Instagram Reels that showcase the gap between a stressful workday. Each concept: title, 3-second hook, key visual, emotional triggered"

OUTPUT

"For Third Space, the most effective Reels won't sell fitness—they'll **dramatise** the emotional transition from **pressure** → **reset** → **performance**. The audience isn't looking for workouts; they're looking for **relief, control, and a competitive edge**."

"... This positions Third Space not as a gym, but as the bridge between a **demanding career** and a high-performance life."

HUMAN EDIT

Initial draft focused on the showcase of "the gap between a **stressful** workday"

Reframed to "the **relief** of arriving at Third Space"

The brand does not lead with stress -> it leads with **release**. Third Space sells the destination, not the problem,

ChatGPT Returned 6 Concepts

"5:47 PM"

1

3-SECOND HOOK

"One more email..."

KEY VISUAL

Split-screen. Left: Slack notifications, overflowing inbox, stressed expression. Right: Walking into Third Space, phone goes into locker, deep exhale.

EMOTIONAL TRIGGER

Relief — permission to disconnect.

"The Reset Button"

3

3-SECOND HOOK

"Your stress has a place to go."

KEY VISUAL

Close-up of tense shoulders and clenched jaw. Match-cut to medicine ball slam, ski erg sprint, then post-workout recovery smile.

EMOTIONAL TRIGGER

Release — transforming pressure into energy.

"Tomorrows Success Starts Tonight"

6

3-SECOND HOOK

"Most people recover wrong."

KEY VISUAL

Executive finishes training, moves through recovery suite, enjoys a protein shake. Final shot: confident arrival at work the next morning.

EMOTIONAL TRIGGER

Performance Advantage — recovery as a professional edge, not a luxury.

Stage 02: Outline - Video + Email

VIDEO BRIEF - "The Commute Ends Here"

0-3s HOOK

Extreme close-up: commuter shoes on Tube platform.
Sound: train doors

3-8s TRANSITION

Cut to Third Space lobby. Music rises. Sound: member
swiping in

8-18s Experience + CTA

Split-screen: pool, studio, lockerroom. Close-up: changing
from athletic shoes to work shoes

18-20s END SCREEN

Text: "Your Third Space is waiting"

EMAIL - "Reclaim Your Space"

SUBJECT LINE

Determined through A/B Tested via Klaviyo

OPENER

Personal Hook: "[Name], your [Club Location] misses
you" 1 sentence

BODY + CTA

~ 200 words on what is new in Third Space. End: "Reclaim
Your Space – 30-day rejoinder" Single Button

Stage 03: Drafting - Video

THE DRAFTING PROMPT

"You are writing for Third Space - a luxury health club whose tagline is "Training for Life". Voice: Aspirational, warm, direct. Never use: workout, gym, sweat, hustle. Always use: space, move, restore. Audience: Maya - a 29-year-old senior consultant who values time, exclusivity, and community. Now write a video script using the outline provided"

VIDEO SCRIPT - AI FIRST DRAFT

[0] Sound: Tube doors. Feet on platform

[3s] Doors open - Third Space lobby

[8s] Pool. Studio. Steam room

[18s] "Your Third Space is waiting" Logo

Assembly: Generating & Combining The Video

PROMPT

"Generate a series of individual 8-second cinematic clips, one for each beat of the approved storyboard — Tube exit, lobby arrival, studio and locker sequence, end card — matching the visual brief, wardrobe and lighting set out in Stage 02 and Stage 03."

OUTPUT

- Gemini returned a separate clip for each storyboard beat, individually matching the framing and mood — but with no guaranteed continuity between clips, since each was generated independently.
- Multiple takes were generated per beat; the strongest, most on-brief clip for each scene was selected before assembly began.

HUMAN EDIT

- Clips manually sequenced into the exact order set out in the Stage 02 storyboard.
- Colour, pacing and on-screen text nudged for consistency across every clip.
- Final sequence checked against the campaign narrative and CTA before export.

HERO CONCEPT

"The Commute Ends Here"

Multiple Gemini clips combined into one continuous story — the final cut is submitted separately as a video file in the group's zip submission.

Stage 04: Editing - Video

01 PERSONA DIRECTION

AI DEFAULTED TO

Male executive lead across 5 of 6 concepts — suited professional, city backdrop, gym floor.

WE CHANGED TO

Female lead throughout. Our target is Maya — a 29-year-old senior consultant. A male default would alienate our primary audience before the hook lands.

02 VISUAL FORMAT

AI DEFAULTED TO

Talking-head or action sequences — scripted as filmed performance pieces requiring a full crew.

WE CHANGED TO

Text overlay on footage. Works muted (72% of Reels are watched without sound), lower production cost, and cleaner against the Third Space aesthetic.

03 CONCEPT SELECTION

AI DEFAULTED TO

"5:47 PM" and "The Reset Button" shortlisted but rejected. Too generic and too aggressive for Third Space tone.

THE CONCEPT WE CHOSE

"The Commute Ends Here" — Tube exit to Third Space reception maps directly to Maya's daily commute. Strongest emotional transition moment of the six.

EDIT PRINCIPLES: AI generated the options. Our judgement decided what fit the brand, the audience, and the platform.

THIRD SPACE

GROUP 1

AI Concept (Long Form Video): Before Edits

THIRD SPACE

GROUP I

AI Concept (Long Form Video): After Edits

Stage 01: Ideation (Email)

PROMPT

"You are a CRM Manager for Third Space. Generate a lifecycle **email strategy for lapsed members** who cancelled 2-3 months ago. Identify the win-back email's **purpose, emotional objective, business objective, recommended CTA, and priority level**. Avoid inventing customer data; base recommendations on CRM best practice."

OUTPUT

Identified win-back as a **high priority**, given that re-acquisition is cheaper than new-member acquisition. Suggested purpose: rekindle **emotional connection** + create urgency via a limited-time offer.

Recommended tone: **warm, slightly nostalgic, offer-led**

HUMAN EDIT

We rejected the "**emotional reconnection**" framing AI defaulted to. Maya doesn't respond to nostalgia or guilt; she responds to **clear information** and **status-relevant proof points**

Reframed the objective as **factual, not emotional**: tell her what's changed, remove **friction**, one clear ask.

Stage 02 & 03: Drafting (Email)

THE DRAFTING PROMPT

"You are a CRM manager for Third Space, a premium London health club. Write a win-back email for a lapsed member who cancelled 2-3 months ago. Include a subject line, preview text, headline, body copy, and CTA. Offer 50% off for 30 days to encourage rejoining."

EMAIL - AI FIRST DRAFT

Subject: We Miss You! Come Back to Third Space 🏋️

Preview: Your fitness journey is waiting to continue!

Headline: We Want You Back!

Body: Hey [Name], we've missed seeing you at Third Space! Life gets busy; we get it, but your fitness goals don't have to wait any longer. We've added amazing new equipment, incredible new classes, and our community is more vibrant than ever. Don't let another day go by without taking care of yourself. Come back and rediscover why you loved training with us!

CTA: Rejoin Now and Save 50%!

Stage 04: Editing (Email)

01 TONE

AI DEFAULTED TO

"We Miss You! Come Back to Third Space 🙏" —
guilt-based, emoji, exclamatory

WE CHANGED TO

"3 Days Left to Renew"
Why: States a fact, not a plea → respects her
intelligence, matches the brand's understated register

02 LANGUAGE

AI DEFAULTED TO

"amazing new equipment, incredible new classes" —
vague adjectives

WE CHANGED TO

Named upgrades: redesigned mind-body studios,
expanded recovery suite, upgraded strength floor
Why: Proof over adjectives; same principle applied across
video and blog

03 CTA & URGENCY

AI DEFAULTED TO

"Don't let another day go by... Rejoin Now and Save
50%!" — pressure-based, multiple exclamation
marks

WE CHANGED TO

"Save over 50% for 30 days. No commitment." + single
CTA: "Reclaim Your Space — Rejoin Today"
Why: Removes urgency-through-guilt; a status-driven,
time-poor persona responds to clear value, not pressure

EDIT PRINCIPLES: AI's default win-back pattern relies on emotional pressure, typical of mass-market fitness marketing. For a premium persona, pressure reads as desperate. The fix was replacing urgency-through-guilt with concrete, factual value.

Stage 01: Ideation - Blog

PROMPT

Context: You are an expert SEO and Answer Engine Optimization (AEO) strategist working for the premium London luxury health club brand Third Space...
Target Audience Persona: Maya [full persona provided]
Task: Generate 5 sophisticated long-form blog concepts...

OUTPUT

Identified three high-intent search vectors:

"Is Third Space worth it?"
"Best luxury gym London"
"What's new at Third Space?"

Selected concept:

Working Title:
Is Third Space Worth It? An Honest Look at London's Premium Training.

Target Query:
"Is Third Space worth it?"

HUMAN EDIT

Rejected generic lifestyle content
Shifted from SEO keywords to conversational search behaviour
Built one pillar asset capable of satisfying:
Transactional intent
Comparative intent
Discovery intent

Stage 02: Outline - Blog

AI OUTPUT: STRUCTURE

Introduction: Definition of Third Space and overview of clubs (100w)

Core Offer: Equipment and facility breakdown (200w)

The Demographic: Who trains at the club (150w)

Market Growth Data: Premium market capitalization metrics (150w)

Financial Math: Breaking down the price per session value (150w)

Competitive Comparison & Limitations: Combined review section (250w)

Final Verdict: Summarized recommendation (100w)

HUMAN REFINEMENT

Problem 1

AI opened with a generic definition of Third Space.

Edit

Moved verdict into opening paragraph.

Problem 2

AI buried limitations inside comparison copy.

Edit

Created standalone "Honest Limitations" section.

Problem 3

PR-style soft language weakened credibility.

Edit

Increased transparency to improve trust metrics and AEO performance.

Stage 03: Drafting - Blog

THE DRAFTING PROMPT

"[...]The brand tagline is 'Training for Life.' Tone Guidelines: Sophisticated, confident, understated, inspiring, and completely devoid of high-pitched, budget-gym marketing hype. [Audience Profile...] Execution Parameters: Expand the human-approved outline into a full, 1,200-word editorial piece. You must front-load a two-sentence direct answer target for conversational search engines. [...]"

AI FAILURE PATTERNS

Hyperbolic adjective loading

"world-class personal training"

Factual hallucination

"£2.3 billion"

Evasive critique

"some members occasionally mention..."

HUMAN REFINEMENT

"Award-winning personal trainers from £85/hour."

"The UK premium gym segment is currently valued at £1.1 billion."

"The cost is real. £200 a month is a significant monthly outgoing."

Removed:

"Your exciting fitness journey starts here!"

Stage 04: Editing - Blog

01 AI DEFAULTED TO

"Unrivalled luxury recovery facilities await you."

WE CHANGED TO

"A curated recovery suite of wet spas, saunas, and contrast therapy."

WHY

Transforms broad marketing claims into descriptive, sensory-rich features that define luxury positioning.

02 AI DEFAULTED TO

"While some members occasionally mention the pricing structure..."

WE CHANGED TO

"The cost is real. £200 a month is a significant monthly outgoing."

WHY

Establishes authentic, unhedged honesty that builds absolute trust with analytical readers.

03 AI DEFAULTED TO

"The community is super vibrant, loud, and welcoming!"

WE CHANGED TO

"The community is real without being loud about it."

WHY

Adjusts the tone from aggressively energetic to understated, elite, and exclusive.

EDIT PRINCIPLES:

AI defaulted to softened, defensive language. Our audience values direct evaluation over corporate reassurance..

OUR PROCESS

Human + AI Workflow

AI accelerates the early stages; humans own judgment, fact-checking and final approval.

THIRD SPACE

GROUP I

SECTION 04

Optimisation

How we sharpened the content for reach, voice and results.

MEDIA FEATURES

OPTIMIZING FOR AI-POWERED SEARCH

Answer Engine Optimisation

Unlike SEO, AEO targets how ChatGPT, Perplexity and Google AI Overviews answer direct questions.

*Maya searches "**best gym London**"*

We want Third Space to be the answer, not just in the results

"Is Third Space worth it?"

Blog embed answers this directly

"Best luxury gym London"

Email landing page targets this

"What's new at Third Space?"

Structured video titles help target query

MAKING IT WORK FOR MAYA

Measuring SMART Success

VOICE FIT, IS IT MADE FOR MAYA?

Yes, every choice maps to her profile.

Confident & premium, never hype

Matches her refusal to compromise.

Respects her time

3-second hooks, one CTA, pre-workout sends.

Proof over adjectives

Leads with Eleiko, no queues, 05:30 open.

Validated, not assumed

AI voice-consistency check vs brand guidelines.

KPIs — SPECIFIC, MEASURABLE, TIME-BOUND

METRIC	TARGET	BY WHEN
Instagram follower growth	+10%	6 months
Reel completion rate	≥ 40%	90 days
Save / share per Reel	≥ 2%	90 days
Email open rate (Klaviyo)	≥ 35%	Per send
Email CTR to rejoin CTA	≥ 4%	Per send
Comment sentiment (AI-scored)	≥ 80% +	Ongoing

Every KPI is SMART, a specific metric, a number to hit, and a deadline to hit it by. Voice fit isn't a feeling: AI sentiment scoring turns it into a number we can track.

AI APPLICATION

How AI Shaped Optimisation

OPTIMISATION AREA	HOW AI HELPED	OUR HUMAN EDIT
 Engagement & media	Brainstormed formats: Reels, quizzes, pull-quotes	Kept what fits Maya; cut the rest
 Accessibility	Suggested captions, alt text, plain-text; flagged contrast	Chose Kapwing & Klaviyo; set WCAG 2.2 AA
 Answer Engines (AEO)	Rewrote key sections as Q&A; drafted FAQ schema	Verified answers; kept the brand voice
 Voice alignment	Ran voice-consistency + readability checks	Stripped hype to match Maya's tone
 KPIs	Proposed metrics and starting targets	Made them SMART; fact-checked benchmarks

Tools: ChatGPT-4o · Claude · Kapwing AI · Klaviyo AI. *AI brought speed and options; we brought judgment, brand fit and fact-checking.*

THIRD SPACE

GROUP I

SECTION 05

Conclusion

What we learned, and where AI ended and we began.

What We Learned

1

AI accelerated the process

Concepts, drafts and clip generation moved fast, but the £2.3bn hallucinated statistic and the male-default lead in 5 of 6 video concepts show speed and correctness aren't the same thing.

2

Human judgement created the value

Every AI default we overturned: guilt-based email CTAs, vague pricing hedges, a male-led opening failed the same test: would this land with Maya specifically, not a generic fitness audience.

3

The strongest content starts with the audience

Every decision traced back to Maya's specific profile. But Maya herself was built from synthetic data fact-checked on market stats, not on real member behaviour. The strongest content in this deck is only as reliable as the persona behind it.

AI gave us speed and range. Validating persona fit and factual accuracy was ours to do and that's what made the result Third Space-specific, not generic.

CRITICAL ANALYSIS

Where We'd Go Further

What our best catches reveal about AI, and what we couldn't verify.

THE PATTERN

AI defaults to 'average', not correct

Our two strongest edits the male-default lead in 5 of 6 video concepts, and the invented £2.3bn market figure share one root cause. Models default to statistically average outputs (average protagonist, average-sounding stat) rather than checked or persona-specific ones.

THE LIMITATION

Synthetic personas can't replace real users

Maya was built from 50 AI-generated profiles, not real Third Space members. We fact-checked the stats we could not fact-check her behaviour. Our KPI targets are informed estimates, not validated benchmarks.

Next time: pair synthetic persona data with even light-touch primary research (5–10 real member interviews) to validate motivations before they shape a full content strategy.

THIRD SPACE

GROUP I

THANK YOU
